Everything You Need

CONNECT Time Attendance · Features at a glance

Secure Web Application
Built on the latest .NET Core technology.

Role-Based Dashboard
User-friendly dashboards for users and HODs, based on their rights.

Third-Party Integrations
Connects with your existing business software.

Multi-Device Support
Works with multiple biometric devices, with easy device management.

Face Attendance Anywhere
IP camera, web camera and mobile camera via our own FaceBio engine.

30+ Report Types
Over 30 ready-made reports plus customised reports.

Night & Auto Shifts
Overnight shifts with automatic shift detection.

Built for Large Data
Handles large workforces and attendance histories with ease.

Multi-Tenant
Manage several companies or branches from one system.

Payroll & HRMS Integration
Feeds attendance straight into payroll and HR systems.

Employee Self-Service
Staff can view records and submit requests themselves.

Web Check-In
Remote and field workers can check in from the web.

Cloud
Hosted, accessible anywhere

On-Premises
Runs on your own servers
